

To create your direct link to an Arizona Health Sciences Library article follow these steps.

- 1) Locate the full text of the article you want in the AHSL database.
- 2) Once you have the article, open a new window or tab and go to <http://ahsl.arizona.edu/services/direct-link>. Here, you can generate your link, by either entering the URL of the resource, or the DOI number, then clicking "Show URL". See Figure 1 to locate where the URL or DOI Number would be. See Figure 2 to see where to enter this information in the second link.
